Internship Module1 Report

Project Name: Calendar

Name: Mohmad Aymen Naqash

PS No: 99007879

Email: mohmadaymen.naqash@lts.com

INTRODUCTION:

The project created in C language is named **Calculator**. It is used to display month by month calendar of a given year. The primary practical use of a calendar is to identify days: to be informed about or to agree on a future event and to record an event that has happened. Days may be significant for agricultural, civil, religious, or social reasons.

In this Calendar project, 3-important operations are done:

1. Find the day corresponding to a given date.
2. Open full month calendar.
3. Add Notes

REQUIREMENTS:

High Level Requirements:

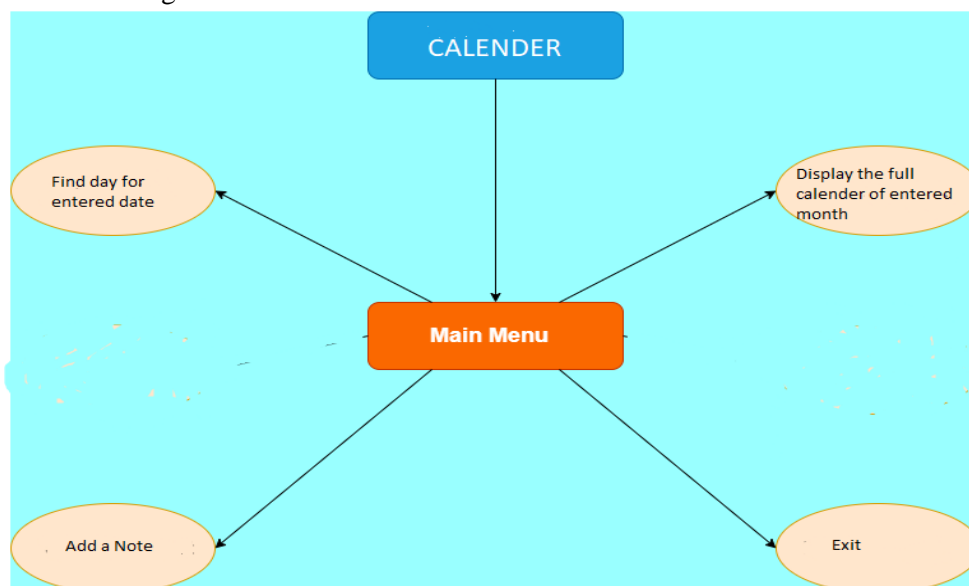

<u>Description</u>	<u>Status</u>
1) Main Menu	Implemented
2) Data Saving	Implemented
3) Date Finding	Implemented

Low Level Requirements:

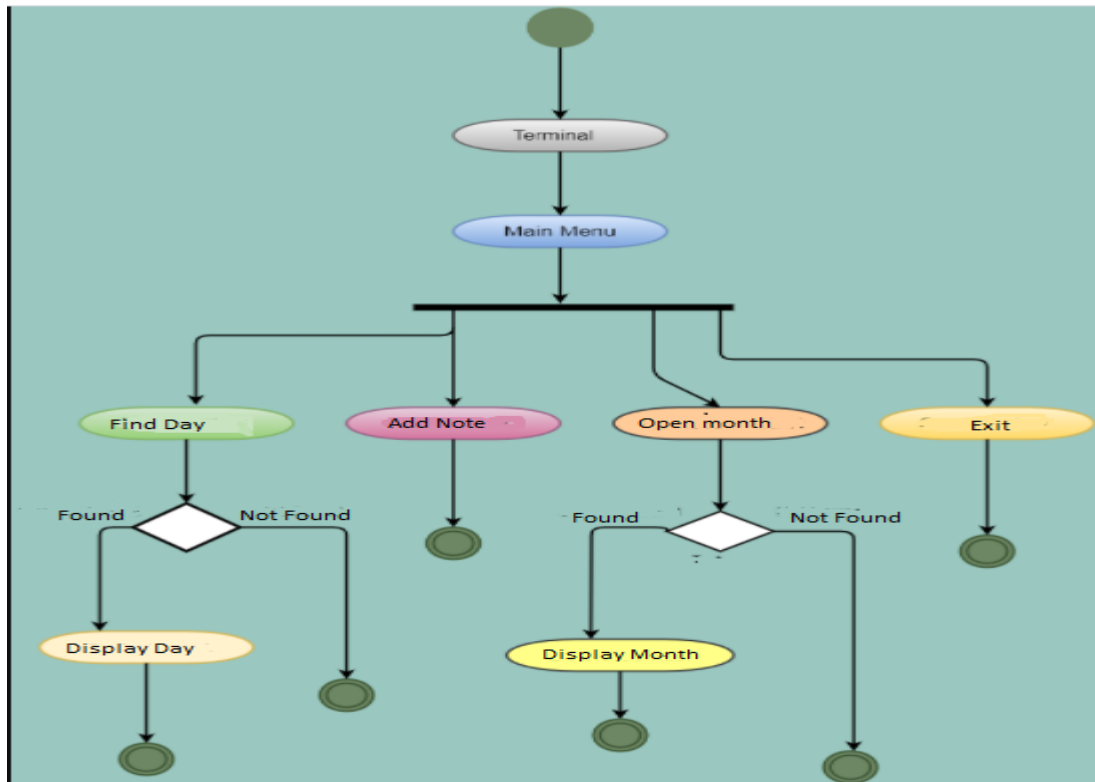

<u>Description</u>	<u>Status</u>
1) New calendar should give the day-name for entered date.	Implemented
2) Should display the complete month calendar which is entered by user.	Implemented
3) Should be able to add notes	Implemented
